Final Project - Cs50x 2021

Name : Nima

Last Name : Ghasemzadeh
Github : nimaaghasemzdeh

About Final Project:

NimCloud is a Cloud Hosting Website, You Can Deploy Your Website Less Then 60 Seconds With Just $9 Per Month.

This Website Is Created Whit HTML(HyperText Markup Language), And CSS(Cascading Style Sheet) And JavaScript To Build Dynamic Website And Better Experience. I Not Use Wordpress Or Any Type Of Css Framework's, It's Full Responsive And It Look's Clean And Good On Any Type Of Standard Device. Importantly Is Easy To Use And The Ui Design Is Stand's For Natural User Interface. At The Top Of The Website We Can See Navigation Bar And Logo, Nav Bar Is Created Whit Flex Box . And After That We Have Hero Section, All The Section In Website Have Same Layouts, Grid Layout With One Row And 2 Column. I Add All The Components In Separate Folder For Easy To Use For Everyone. We Have Object Oriented Css And In The Second Rule Of Object Oriented Css We Need To Separate Structure From Skin, That Principle Gave Us A Better Access For Each Different Element And Less Code, DRY Or Don't Repeat Yourself. Thats At All I want To Add More Technical Informations in README File. Here is Some Detail From Website:

• Navigation Bar For Display Size More Than 768px

• Navigation Bar For Mobile Devices - Collapsible Mode

NimCloud

Cloud Hosting for Pros

Deploy your websites in less than 60 seconds.
